Working Student (m/f/d) - Development Support

Bewerben

 Hamburg

 Part time

 R-20007868

About your role

You will have a rewarding experience where you will collaborate with many colleagues. We will provide you with real-world exposure which will be valuable after your graduation.

Your support will enable us to keep our world leadership position.

What you will do

- Supporting us in innovation activities and new product developments
- Collaborate with project teams for new product introduction

Potential areas of support:

- Project documentation & reporting (in Sharepoint/Monday.com/MS office/etc)
- Agile project methods
- Competitor investigation
- Data management
- Quality processes
-and many more

What you will need

- Enrolled student in a technical field (e.g. electronics, physics, industrial/SW engineering, etc)
- Fluent in English, spoken and written
- Passion to work and communicate in a team
- Openness and willingness to learn
- Flexibility to handle both standard and special tasks
- Curiosity and creativity
- You are highly motivated, self-driven with independent work style

Why work for us?

- A great opportunity to experience our semiconductor development process from different angles
- A strong integration into our great develop team enabling you to create your potential future network
- An international and cross-culture experience
- Openness to bring in and establish own ideas for improvements
- A temporary contract with extension option
- Working hours: max. 18h/week
- 17,50€ per hour
