

# Advertising policy

- The student council ET/IT (FSR) exclusively advertises matters in the social, economic or cultural interest of the students of the student association Electrical Engineering and Information Technology.
- The FSR supports and advertises measures for political education and the students' sense of civic responsibility, but categorically excludes party-political advertising.
- Furthermore, the FSR promotes civil companies and institutions, especially in job offers, and actively supports the peaceful development of society..
